Portfolio — GitHub — LinkedIn

Summary

Backend-focused Full Stack Developer with experience building scalable APIs, multi-agent AI systems, and data pipelines. Skilled in Node.js, Express, MongoDB, and system design with a focus on performance and reliability.

Education

Tezpur University

Expected June 2026

B.Tech in Computer Science and Engineering

CGPA: 7.39

Technical Skills

Languages: JavaScript, TypeScript, Python, C++

Backend: Node.js, Express.js, REST APIs

Database: MongoDB, SQL

Frontend: React, Next.js

Tools: Docker, Git, GitHub, Postman, Vercel

Experience

CDAC Pune — Intern

Jun 2025 – Dec 2025

- Worked on a multi-agent AI system to extract financial KPIs from unstructured documents, improving data retrieval accuracy by **40%**.
- Designed a stateful pipeline using LangGraph handling **1000+ document queries/day**.
- Integrated vector search (Weaviate) reducing query response time by **30%**.
- Processed large PDFs using PyMuPDF and embedding models (Sentence Transformers, Mistral 7B).

Google Developers Group, Tezpur — Programming Lead

Aug 2024 – Aug 2025

- Led and organized **10+ coding events and hackathons** with **200+ participants**.
- Improved student engagement in technical activities by **35%**.
- Coordinated with cross-functional teams to execute community programs.

Freelance Work

TenHours — E-commerce Platform (In Development)

React, Node.js, Express, MongoDB, Typescript

- Building a full-stack e-commerce platform supporting **retail and wholesale workflows**.
- Designed REST APIs handling **authentication, product catalog, and order processing**.
- Implemented scalable backend architecture to support **1000+ concurrent users** (planned).
- Optimized database schema for faster product queries (**25% reduction in response time**).
- Live: [Project Link](#)

Projects

Child Vaccination Tracking System

React, Node.js, Express, MongoDB

- Built a backend system for managing vaccination scheduling across regions.
- Designed APIs for doctors, parents, and admin handling **500+ users**.
- Reduced booking conflicts by **30%** using structured scheduling logic.
- Live: [Project Link](#)
- GitHub: [Repository](#)

Portfolio Website

Next.js, Tailwind CSS

- Designed and deployed a responsive portfolio showcasing projects and technical skills.
- Improved performance score to **70+ Lighthouse** through basic optimizations.
- Implemented reusable components and clean UI architecture.
- Live: [Project Link](#)
- GitHub: [Repository](#)

Chain Reaction Game

Python

- Developed a grid-based strategy game with BFS-based optimal move logic.
- Reduced computation time by **20%** using optimized traversal.
- GitHub: [Repository](#)

Extracurricular

- NSS Volunteer, Tezpur University
- ISEA Bootcamp (Phase III)
- Sports: Badminton, Gym, Skating
